bolink™

Large Cap Gravity Feeding Set with ENFit™ Connector

REF BK-2405   NON STERILE

Indications for Use: The U Deliver Bolink ENFit Enteral Feeding Sets are intended for over-the-counter use to deliver liquid nutritional formulas or water to a patient's enteral access device (feeding tube).

Device Description: The Bolink™ large cap gravity feeding set consists of tubing **(A)** with a clamp **(B)**, a screw cap **(C)**, an ENFit™ connector **(D)** for connecting to feeding tubes and a protective cap **(E)**.
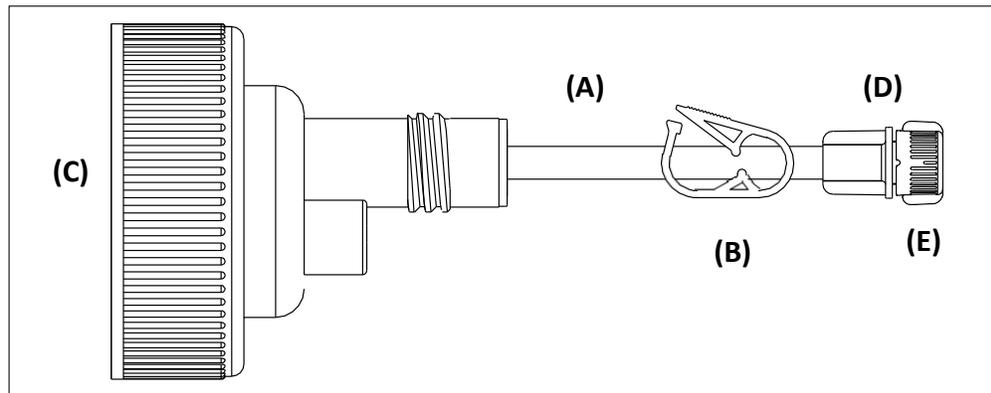

The Bolink™ large cap gravity feeding set is intended to connect compatible commercially available collapsible food containers with 40 mm diameter connectors to feeding tubes with ENFit™ proximal connectors.

Not made with natural rubber latex. Not formulated with DEHP or BPA.

Warnings:

- For enteral feeding only.
- This device incorporates an ENFit™ Connector which is designed to reduce the likelihood of tubing misconnections; however, the potential to misconnect this device with connectors of other healthcare applications still exists.
- Small parts are a potential choking hazard if this device is not used as intended. Use under adult supervision.
- Do not use with non-collapsible food containers.

Precautions:

- This device should be discarded after 24 hours and replaced with a new device.
- For single patient use only.
- Dispose with household waste. Do not recycle.

Instructions for Use:

1. Confirm feeding tube position and flush following manufacturer's instructions.

2. Close clamp (B) on Bolink™ Tubing (A).

3. Remove cap on collapsible food container, attach screw cap (C) to filled food container and confirm cap is secured tightly.

4. Open clamp (B) and squeeze collapsible food containers to fill Bolink tubing (A).

5. When tubing is filled, close clamp (B).

   WARNING: Before connecting to a feeding tube, confirm that the Bolink tubing is being connected to a feeding tube only. DO NOT connect to non-feeding tube. This includes confirming that any transitional connector with a Christmas Tree Tip used are connected to a feeding tube and not IV tubing.

6. Remove protective cover (E), use ENFit® connector (D) to attach Bolink tubing to feeding tube. If the feeding tube has a funnel instead of an ENFit connector use a transition connector with Christmas tree tip.

7. Open clamp (B), hold food container above feeding tube to start gravity flow, and, if necessary, squeeze container to control delivery rate.

8. When finished, close clamp (B), disconnect Bolink tubing from feeding tube and collapsible food container.

9. Flush Bolink tubing (A) with tap water by holding under a faucet and letting water flow through the tubing until the water runs clear.

10. 9. Flush feeding tube following manufacturer's directions.

Connect this end to feeding tube.
